# Forager keymap

Colemak on macOS · AI workflow · ZMK

AI agent and terminal · Browser · Modifier · Power and firmware · Held thumb

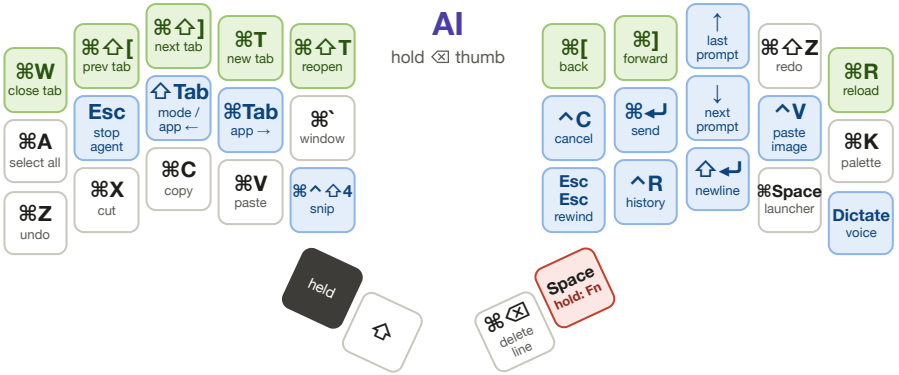

## Base

plain Colemak

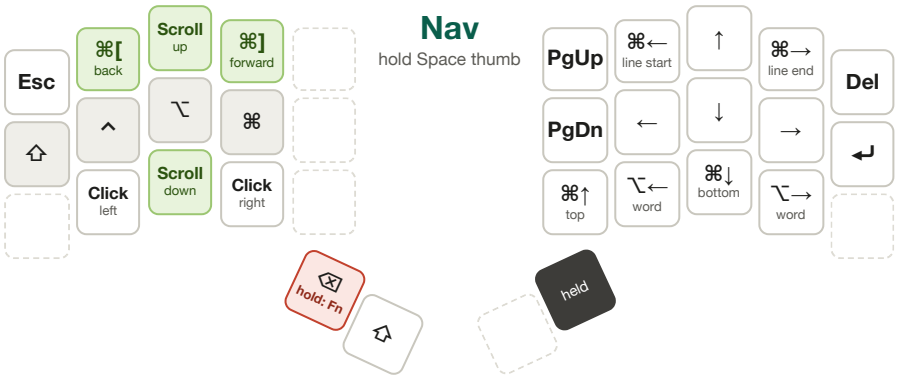

## AI

hold ⌫ thumb

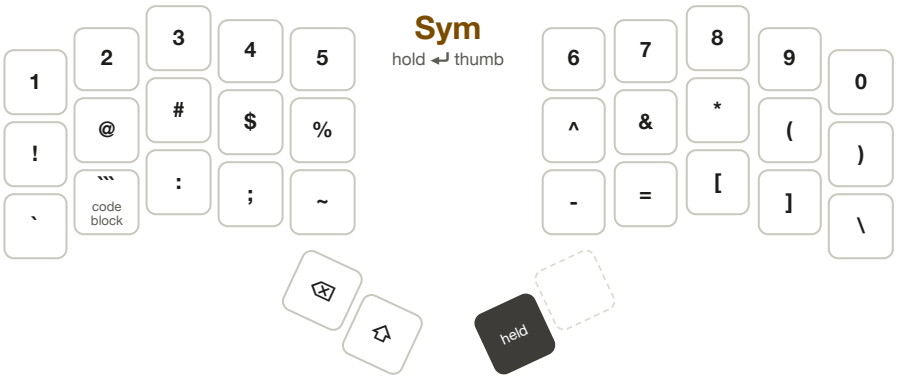

## Nav

hold Space thumb

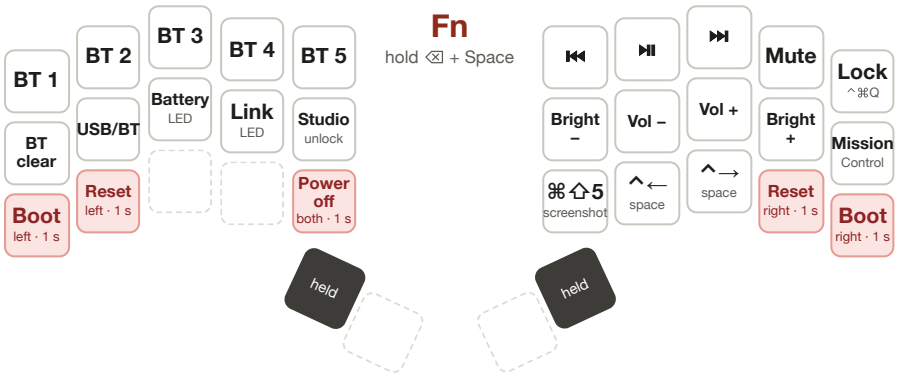

## Sym

hold ↵ thumb

## Fn

hold ⌫ + Space

## Combos

press together, on Base

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| W + F | Esc | F + P | Tab | Z + X | ⌘X cut | X + C | ⌘C copy |
| C + V | ⌘V paste | , + . | ; semicolon | . + / | : colon | ⇧ ⇧ | caps word |

## Power

no switch: sleep is automatic, off is a key

- **30 min idle** — Each half sleeps by itself. Any key wakes it.
- **Fn + B** — Hold 1 s: both halves fully off (bag, travel).
- **inner thumbs** — Press the inner thumb key on each half to turn it on.

## Flashing

Fn = hold ⌫ and Space thumbs, then hold the key 1 s

| | | | |
|---|---|---|---|
| Fn + Z | Bootloader, left | Fn + / | Bootloader, right |
| Fn + X | Reset, left | Fn + . | Reset, right |

Bootloader mounts **XIAO-SENSE**: copy that half's **.uf2** onto it. App switcher: hold ⌫, tap **T** (**S** back), release. Mac: keep the **Colemak** input source; dictation shortcut **Right ⌘ twice**.
